

Accessories for separable connectors

For serie 250 A - Interfaces A

formfit[®]

elascon
 EC

Medium Voltage (MV)

Up to 24 kV

MV Separable Connectors

Reference : FMR-250 / FMPD-250 / FMPS-250 / FMPE-250

Dead-end receptacle - FMR-250

- EPDM moulding with semi-conducting EPDM jacket. Provides a dead-end facility for insulating bushings.
- Operated when de-energized.
- Watertight, slipped on with silicone grease.
- Supplied with locking brace.

Packing

Per piece.

Insulating plug FMPD-250

- EPDM moulding which provides a dead-end facility for separable tee connectors type MSCE-240; MSCS-250; FMCE-250; FMCS-250
- Operated when de-energized.
- Includes a capacitive voltage divider that is protected by a cap of semi-conducting EPDM during normal use.

Packing

Per piece.

INTERFACE
 A

Stand-off plug FMPS-250

- EPDM moulding designed to support and dead-end separable connectors when removed from the equipment.
- The stand-off plug is equipped with a metallic bracket. The part in semi-conducting EPDM provides the electrical continuity with the outer envelope of the separable connector.
- Operated when de-energized.

Packing

per piece.

- 24 kV → **FMPS-250-24**

INTERFACE
A

Earthing plug FMPE-250

- EPDM moulding designed to support and earth separable connectors when removed from the equipment.
- The earthing-plug is equipped With a metallic bracket.

Packing

per piece.
